

Hecate**SOLAR** LA

Hecate**SOLAR** LA IS AN INITIATIVE DEVELOPED BY HECATE ENERGY

Hecate Energy is a firm of experienced renewable energy professionals led by a core team who have worked together for over 20 years developing thousands of megawatts of energy projects. Hecate Energy currently has over 500 MW of solar PV projects under development around the globe, including 200 MW that are under construction and will be producing solar power in 2016.

On June 3, 2014, the Los Angeles Department of Water and Power board unanimously approved the award of 190 MW of solar PV PPAs to Hecate Energy. This award consists of 162 MW utility-scale system in the Mojave Desert and 28 MW of in-city distributed systems. Hecate Energy is committed to using local Los Angeles based businesses to support the project development, construction, and operation of these projects. Hecate Energy has over \$400 million in committed financing for all 190 MW.

HecateSOLAR** LA is a trusted LADWP partner** and is committed to the effort to increase renewable power in Los Angeles. This opportunity to support a power company's Feed-in-Tariff (FiT) with pre-approved access to develop 28 MW of solar rooftop/parking lot power is unique in the United States. This offering came to life after many years of effort by the Los Angeles Business Council, city government leaders, and other committed business and community leaders in Los Angeles.

The 28 MW of in-city distributed solar PV systems must be installed on empty roofs and on parking lot canopies in the City of Los Angeles. Hecate**SOLAR** LA is working to identify property owners willing to lease their 75,000 square feet or larger roofs and 1 acre or larger parking lots to support this increase in renewable energy. Hecate**SOLAR** LA will install and maintain a solar PV system on these leased properties at no cost to the property owner while the owner receives an annual lease payment for a minimum of 20 years.

HECATE

Pronounced: **hek' uh tee**

Hecate Energy's focus echoes the Greek goddess of the crossroads who ruled over the earth, sea, and sky. Our name and logo reflects our mission of developing power generation resources at the crossroads of traditional options and emerging technologies...such as energy storage and low profile wind. It also reflects the "circular trust" shared by communities, utilities and developers when a power project respects its people – and their resources.

POWERED IN PARTNERSHIP WITH Hecate**SOLAR** LA

Time is Running Out. Hecate**SOLAR** LA must complete installation on all 28 MW of new solar power by December 31, 2016. To make this happen all of the willing property owners must have signed leases no later than June of 2016.

Our partnership with commercial and industrial property owners is important. We want to earn your trust by meeting your needs. We can offer flexible payment structures or co-develop solar systems to offset electric bills. If a roof or parking area needs repair, Hecate**SOLAR** LA will work with the owner to support that need. Most importantly, the solar PV system, on the leased roof or parking lot, is completely paid for and maintained at no cost to the property owner.

PARTNERSHIP, COLLABORATION, AND QUALITY ARE CORE VALUES AT HECATE ENERGY.

The partnership with LADWP; the City of Los Angeles; Hecate**SOLAR** LA financiers; the local solar PV industry; and the commercial and industrial property owners, who choose to work with us in Los Angeles, are helping to change the face of energy in the Los Angeles area... for the better!

Hecate**SOLAR** LA Team Leaders:

Chris Bullinger

President of Hecate Energy

Fazli Qadir

Executive VP, Chief Technology Office

Patti Shorr

Vice President, Project Development

Andrew Boggs
